

Installing the tekmar Visio Toolbar

This tutorial will take you through the steps to install a customized toolbar for use when creating schematics using tekmar Visio design stencils.

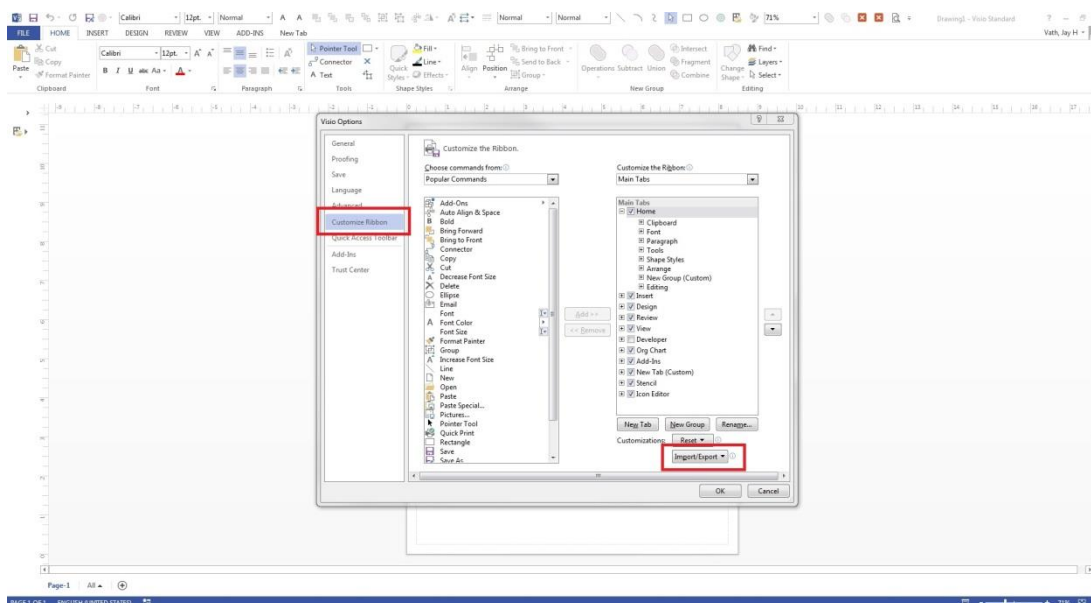

For Microsoft Visio 2010 and newer:

Step 1: Open a new Microsoft Visio drawing.

Step 2: Open the 'File' tab in the upper left corner. Click on the 'Options' section along the left side.

Step 3: Next select the 'Customize Ribbon' option and click on the 'Import/Export' button. Select 'Import customization file' from the dropdown menu.

Step 4: Finally select the downloaded ‘tekmar.exportedUI’ file and press ‘Open’. The customized tools will now be displayed in the Visio ribbon for all future drawings.
